

Senior Scientist - Radioligand Therapy in-vivo Oncology (80-100%*)

Job ID
REQ-10020318
Sep 04, 2024
Switzerland

Summary

Location: Basel, Switzerland
Fulltime, Onsite, #LI-onsite

Novartis' Biomedical Research division is our Innovation engine. We have bold objectives to transform the lives of millions of people living with diseases and conditions and unmet medical needs.

Novartis' Radioligand Therapies are at the leading edge of therapies in Oncology. Applications are invited for a Senior Research Scientist to carry out cutting-edge oncology drug discovery pharmacology research. We seek an experienced, motivated and ambitious individual with a passion for in vivo oncology research. You will join the Radioligand Therapy (RLT) team to develop and validate novel targets in our world leading Oncology portfolio. The position is based in Basel, Switzerland.

About the Role

The ideal candidate should have a passion for working with rodents and a drive to perform in vivo oncology pharmacology studies including micro-surgeries, compound administration and preparation of samples for ex vivo analysis. Hands-on background performing small animal imaging modalities such as PET/SPECT/uCT or in cell biology techniques is a plus. The successful candidate will work collaboratively as an integral part of global projects and be an active member of lab and project teams.

Responsibilities include but are not limited to:

- Develop and characterize novel in vivo oncology models
- Executing efficacy studies with cutting edge radioligand therapies
- Developing and delivering biodistribution studies and metabolites analysis
- Perform pre-clinical imaging studies including PET/SPECT/uCT
- Individually performing and/or supporting colleagues with various in vitro and ex vivo activities (e.g. cell culture, flow cytometry, IHC, immunofluorescence, PCR, Western blotting)

What you will bring to the role:

- Masters degree in pharmacology, cell biology, medical physics, bioengineering, biotechnology or related field or Bachelors degree with equivalent experience. Please note that for this position we do not require a PhD qualified candidate at this time.

- Practical work experience in biomedical research from an industry or academic laboratory
- Experience in performing animal studies (animal handling, drug application, sampling, animal welfare regulations, small laboratory animal surgery)
- Self-motivated, proactive, and able to work independently

Desirable requirements:

- Knowledge and experience of standard cell biology techniques is desirable: cell culture, IHC, immunofluorescence, flow cytometry, quantitative real-time PCR, transfection, western blotting, etc.,
- Highly collaborative team player that enjoys working across multi-disciplinary teams
- Excellent organizational and communication skills
- Knowledge of cancer biology

Accessibility and accommodation:

Novartis is committed to working with and providing reasonable accommodation to all individuals. If, because of a medical condition or disability, you need a reasonable accommodation for any part of the recruitment process, or in order to receive more detailed information about the essential functions of a position, please send an e-mail to inclusion.switzerland@novartis.com and let us know the nature of your request and your contact information. Please include the job requisition number in your message.

Why Novartis: Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you. Collaborating, supporting and inspiring each other.

Combining to achieve breakthroughs that change patients' lives. Ready to create a brighter future together?
