

Renal Medical Lead

Job ID
REQ-10020806
Sep 01, 2024
South Korea

Summary

- Location: Seoul, Korea #LI-Hybrid
- In line with overall product strategy, the Medical Lead is responsible for supporting the design, implementation and execution of Medical Affairs plans for assigned Therapy Area, providing scientific information, helping design & organise clinical studies, building educational dialogue with KOLs and regulatory stakeholders

About the Role

Key Responsibilities:

- Ensure medical enquiries are responded to in a high quality, timely manner, and in accordance with applicable standards; establish standard response documents as appropriate, for frequently asked questions.
- Provide medical/scientific input into the development and execution of clinical trial or clinical research related activities, including initiation and oversight of clinical studies / clinical research within the respective therapeutic area.
- Support country strategy for Non Interventional Studies/Investigator Initiated Trial activities.
- Coordinate review and approval of medical materials and locally developed promotional materials; ensure medical materials provided from global or region for stakeholder engagement and events are tailored to local needs, and reviewed/approved per local/P3 guidelines.
- Ensure medical insights are provided to cross functional groups, including, but not restricted to: Pharmacovigilance, Regulatory affairs, Market Access, QA, Commercial teams, Brand team and others.
- Responsible for risk identification and assessment, mitigation planning as well as implementation and monitoring of appropriate internal controls within the area of responsibilities.
- Reporting of technical complaints / adverse events / special case scenarios related to Novartis products within 24 hours of receipt -Distribution of marketing samples (where applicable)

Essential Requirements:

- At least 3 years of medical affairs experience in pharmaceutical industry
- Proficiency on meeting medical experts and obtaining valuable insight

- Experience of leading the launch process with leadership by accepting the difficulties involved in preparing to launch a drug with a new mechanism for kidney disease as a challenging and meaningful process.
- Understanding and interpreting the pathophysiology, clinical design, and results of rare kidney diseases, active data sharing and scientific discussion.
- Cross-functional collaboration and project leading leading in launching new products
