

IT Solution Delivery Sr. Manager for Medical Products

Job ID
REQ-10026014
Nov 21, 2024
Spain

Summary

Location: Barcelona (Hybrid)

Novartis is unable to offer relocation support for this role: please only apply if this location is accessible for you.

The IT Solution Delivery is a global role responsible for delivery of business solutions and services for the DDIT (Digital, Data, and IT) for US & International Medical Affairs sub-domain. This role is responsible for the end-to-end delivery of projects and operations, collaborating closely with DDIT Strategic Business Partners for demand analysis, solution evaluation, and the successful deployment of projects and products.

About the Role

Major accountabilities:

- **Business Partnership:** Collaborate with IT Strategic Business Partners and business stakeholders to analyze demand, propose solutions, evaluate alternatives, and provide funding estimates.
- **Solution Delivery:** Partner with Technology Service/Solutions Delivery teams to ensure that platform and product strategies align with key market needs, while being scalable and reusable for priority and smaller markets.
- **Project Execution:** Ensure timely, compliant, secure, and within-budget delivery of projects in the assigned business domain.
- **Business Value Delivery:** Guarantee that all services, solutions, platforms, and products meet business objectives and deliver the intended impact.
- **Performance Tracking:** Define, track, and report on success metrics and KPIs for stakeholders within the domain.
- **Industry Awareness:** Keep up with emerging industry trends and practices to drive agility, speed, and efficiency in the solutions delivered.
- **User-Centric Design:** Ensure that the overall user experience is considered when designing and deploying new solutions.
- **Compliance:** Ensure all solutions adhere to security and compliance policies and procedures.

Commitment to Diversity & Inclusion:

We are committed to building an outstanding, inclusive work environment and diverse teams representative of the patients and communities we serve.

Minimum Requirements:

- Education: Bachelor's degree in computer science, Information Technology, Engineering, or related field.
- 10+ years in IT Project/Product Delivery, including strategy development, global project management, people leadership, and stakeholder management.
- Proven experience in the life sciences, pharmaceutical, or medical sectors with a focus on IT product/solution delivery is an added advantage.

Skills:

- Project management, budget management, and risk management.
- Strong business acumen, strategic planning, and performance management skills.
- Ability to manage service delivery and balance global solutions with local needs.
- Proficiency in working with global teams, collaboration, negotiation, and conflict resolution.
- Demonstrated leadership experience in managing teams and stakeholder relationships.
- Communication: Excellent interpersonal, analytical, and problem-solving skills with proven ability to engage with senior management and foster trust-based relationships.

Languages: Fluent in English.
