Summary

Insights and Analytics Manager role

Candidates must possess advanced analytical skills, with proficiency in analysing complex data sets and generating actionable insights. Technical proficiency is essential, including experience with CRM systems, data visualization tools, and performance tracking platforms. Strong written and verbal communication skills are required to present complex data clearly and concisely. Candidates should have a proven ability to work effectively with cross-functional teams and influence decision-making within marketing teams. Additionally, project management skills are necessary to manage multiple analytics and reporting initiatives simultaneously. Attention to detail and problem-solving abilities are crucial for identifying gaps and recommending innovative solutions.

About the Role

Major accountabilities:

- Provides ongoing and regular brand-level market performance down to hospital/territory level, identifying key trends and providing recommended actions to business based on insights
- Actively engage with Marketing, Sales & Medical to identify opportunities, provide recommendations, and implement key reporting/monitoring/performance tracking initiatives that drive competitive advantage
- Business Analytics Management, support in creation of monthly brand tracker, relevant ext. KPIs / performance reports as required
- Conducts ongoing analysis of FF performance vs targets per brand
- Support TA with budget and business planning process on an ongoing basis
- Leads on FF incentive scheme target setting and bonus calculations at brand level and supports Commercial excellence Lead with overall FF incentives process
- Ongoing analysis of TA market evolution and competitor performance at national and sub-national level
- Supports TA with account-level customer understanding (potential, prescribing behaviour segmentation, tiering)
- Supports Commercial Excellence Lead on visualization initiatives and KPI tracking on an ongoing basis
- Supports Comm Ex Lead with Dynamic Resource Optimisation (DRO) analyses
- Identifies data gaps at brand level and identifies potential vendors to address data gaps
- Support Business Excellence and Execution and therapeutic areas for procurement contract negotiations with relevant service & data providers as required
- Support in the use of CRM system and other data source tools at TA level

Minimum Requirements:
