Duration : 12 months

About the Role

Job Description Summary

Novartis Compound Management is seeking for a talented and highly motivated candidate to join a dynamic and multidisciplinary research group.

Your responsibilities:

Your responsibilities include, but are not limited to:

- Support of the stock solution production process
- Helping with weighing out and rapid delivery of compounds to Disease Areas for biological and chemical testing
- Support project teams with weighing and liquid transfer of building block solutions
- Interest in operating automated system (powder store, plate production)
- Supporting global shipping logistics

We are looking for an independent and scientifically curious recent graduate with a Master's or Bachelor's degree in organic chemistry or biology.

What you'll bring to the role:

- Recent Master's graduate or recent Bachelor's graduate in organic chemistry or biology.
- Excellent oral and written communication skills in English, German would be an advantage
- Ability to thrive in a highly collaborative and dynamic international team
- High degree of independence
- Strong quality and customer focus with a clear sense of accountability
- Digitally proficient. Experience with chemical inventory management systems would be an advantage.

Accessibility and accommodation:

Novartis is committed to working with and providing reasonable accommodation to all individuals. If, because of a medical condition or disability, you need a reasonable accommodation for any part of the recruitment process, or in order to receive more detailed information about the essential functions of a position, please send an e-mail to diversity.inclusion_ch@novartis.com, and let us know the nature of your request and your contact information. Please include the job requisition number in your message.
