Zusammenfassung

Location: Hyderabad

As part of the team you will be working on a global quality management system based on the salesforce platform, and join an established team of strong technical and business colleagues working in close collaboration. We work on complex problems in high regulated spaces requiring strong problem solving skills and use of innovative solutions. You will be part of a global team reaching users across every site and office of Novartis.

About the Role

Your responsibilities include, but are not limited to:

- Develop, build, configure, customize, and unit test custom and out of the box solutions using Salesforce platform based on the functional and technical specifications.
- Collaborate with the team for code review and unit testing to produce outstanding code.
- Work to integrate services horizontally across organizational units and manage interfaces between Service Delivery projects.
- Take part in conference calls, stand-up meetings, time tracking and the completion of tickets that have been assigned to you in a Jira instance.
- Promote good communication, problem-solving and self-driven ways of working.
- Support for knowledge transfer, process documentation and application bug fixes.

Minimum Requirements

- Senior proven experience in the Salesforce Platform and key platform technologies
    - Apex
    - Lightning Web Components (LWC)
    - REST, APIs, and SOQL
- Hands-on experience in administration setup, managing users, security controls, and data as well as creating roles, profiles.
- Experience in designing custom objects, custom fields, picklists, page layouts, workflow, approval processes, validation rules, custom tabs, reports and dashboards.
- Understanding of layout concepts and site functionality - common interactions, user interfaces, navigation, etc.
- Experience with Product Development Lifecycle and DevOps tools like GIT, Jenkins, JIRA, etc.

- Strong understanding of other related technologies (SQL, SOAP, HTML5, JavaScript, etc.)
- Knowledge on system / API integration and basic authentication methods (Keywords: SOAP, REST, Salesforce API, OAUTH, SSO)
- You can work independently, proactive identify challenges, problem-solving skills, and be accountable.
- Salesforce Certified Administrator, Salesforce Certified Platform Developer and Fluent English both written and spoken

Desired

- Salesforce Certified Javascript Developer I
- Experience working with Trackwise Digital Quality Management Software
- Experience with platform Events, REST API and SOAP API
