Resumen

Ensure the education/training of healthcare practitioners, clinical investigators, and healthcare decision makers regarding new therapies or new indications developed and (to be) commercialized by Novartis, according to Novartis IMI guidelines, approved budget and strategy, legal and fiscal legislation in force, area defined SOP and superior instructions/ guidelines, in order to meet the information needs and channel external proposals for research.

About the Role

Major Accountabilities

- Identify competitive advantage/differentiation for Novartis and its products in the context of the competition, by developing professional relationships with international, regional, and local Key Opinion Leaders (KOL) as well as ensuring access to current medical and scientific information on Novartis products and areas of therapeutic interest in order to contribute to the development of advocates of Novartis products and positions and capturing insights according to strategy.
- Provide medical and scientific information to healthcare professionals including physicians, and other practitioners and formulary committees, consultant pharmacists, among others, to assist in keeping their knowledge updated, in order to ensure they have medical and scientific information necessary to respond to questions regarding products encountered during their presentations.
- recommending investigators for clinical programs to expand experience base and facilitating the identification and presentation of appropriate investigator proposals to be considered for support, in order to contribute to successful development of phase II-IV clinical programs and RWE studies implementation, thus contributing to the enhancement of medical and scientific areas.
- Provide medical and scientific data to customers and sales forces, namely by attending and supporting scientific and medical meetings and cross-functional meetings with medical needs, preparing planned post-meeting deliverables as well as acting as a major or single point of contact for medical/scientific data, thus contributing to the achievement of the objectives.
- Interact with others in a positive and constructive way, being open to diversity and aligned with corporate guidelines, in order to guarantee Novartis has a working environment free from all forms of discrimination and harassment as well as contributing to a positive and inclusive working environment.
- Work within Integrity and Compliance policies and ensure those around him/her do the same, complying with job Excellence Standards in order to contribute to the alignment with Novartis Global procedures and objectives.

Additional Specifications

- External Activities, KOLs focused: > 70% external time in the field
- Scientific data exchange with KOLs: Clinical trial, research, pipeline data, obtain advice & feedback
- KOLs involvement in scientific projects, clinical research and scientific contributions
- MSL Strategic medical contribution to the compound: external/internal presentations, training /education contributions internal/external
- Insights collecting to the strategy
