Résumé

Healthcare Professionals and Patients will be impacted by our internal agile teams who will co-create solutions for some of the most innovative therapies on the market. This is an exciting opportunity for you to shape how digital services are designed and delivered in a high impact environment, helping us to reimagine medicine!

About the Role

Major Accountabilities:

- Design and implement user interfaces using Angular patterns, HTML, CSS, and Typescript, ensuring a seamless user experience.
- Develop and maintain robust backend applications using .Net, C#, SQL Server, and Azure functions, ensuring data integrity and security.
- Write clean, efficient, and maintainable code following industry best practices and standards, promoting code quality and readability.
- Focus on performance optimization by identifying and resolving UI/UX issues, ensuring the application runs smoothly and efficiently.
- Collaborate with cross-functional teams to deliver software solutions on the Azure infrastructure, leveraging integration and synergies.
- Conduct peer reviews of developed solutions and maintain formal documentation, promoting code review processes and knowledge sharing. Ensure that unit testing of application solutions meets quality standards, improving code reliability and minimizing errors.
- Take accountability for the quality of the software build ensuring alignment with both security and compliance policies and procedures. Utilize DevOps practices to support deployment of your software into project environments.

Minimum Requirements:

- Proven work experience as a software engineer / developer or similar role demonstrating hands-on experience in application development. Strong knowledge and experience with Angular patterns, HTML, CSS, Typescript, Kendo, Components, and Unit testing.
- Proficiency in backend development using .Net, C#, SQL Server, and Azure functions. Familiarity with performance optimization, AWS, profiling, lazy loading, and dependency injection.
- Familiarity with Angular CLI, SOLID principles, and micro-services architecture Knowledge of building components for frontend applications.
- Familiarity with DevOps practices and CI/CD pipelines, ensuring smooth and efficient software delivery

and deployment. Familiarity with Agile development methodologies, promoting collaboration, adaptability, and continuous improvement.

- Commitment to best practices, code quality, and maintainability, ensuring the long-term success of the software applications. Proactive attitude and ability to work independently, with excellent problem-solving skills and attention to detail
- Azure certifications are a plus, showcasing expertise in Microsoft Azure cloud services and technologies. Excellent communication and interpersonal skills, enabling effective collaboration and teamwork.
- Bachelor's or master's degree in computer science or a related field is preferred, demonstrating a strong academic foundation in software engineering principles.
