Résumé

The Data Governance and Quality Manager will lead the development and implementation of data governance frameworks, ensuring the quality, consistency, and security of data across the ERC function. This role is responsible for overseeing data governance capabilities, data quality management, master data management processes, and ensuring that business and data architecture are aligned with organization goals. Reporting to the Head ERC Transparency & Data Management, the Data Governance and Quality Manager will collaborate with stakeholders across the functions to promote a culture of data quality and governance, enabling data-driven decision-making throughout the organization.

About the Role

Major accountabilities:

-

Minimum Requirements

- Proven experience in data governance, data quality management, or data architecture roles
- Deep understanding of data governance frameworks, data management best practices, and MDM principles
- Experience with data quality management tools and techniques, including data lineage, data profiling and data cleansing
- Strong knowledge of enterprise data architecture and data modeling standards
- Strong communication skills, with the ability to influence stakeholders and explain technical concepts to non-technical audiences
- Proficiency in data management platforms, ERPs, and business intelligence tools
- Why Novartis:
