Résumé

Our Associate Director Innovation, reports to the Head of Innovation. Your role will be pivotal in leading the innovation within PS&PV (Patient Safety & Pharmacovigilance) and transforming it into a future-focused powerhouse. You will drive key innovation projects, initiatives and strategic process improvements, supporting the overall Development and Novartis strategy.

About the Role

Location: Barcelona, Spain

Working model: Hybrid working model (which requires 12 days per month in the office)

Note: Novartis is not able to offer relocation support for this role. Please only apply if this location is accessible for you.

Major accountabilities:

- Be curious and leverage internal and external technologies and opportunities to drive innovation within PS&PV
- Participate in internal innovation boards
- Execute or contribute to PS&PV and enterprise level innovation projects in alignment with the roadmap – champion cross-functional initiatives and innovations
- Lead or contribute to major projects as Innovation lead,• Help to identify the right technologies and partners• Bring new technologies to the organization and/or leverage existing tools within Novartis• Help to ensure fast delivery to the business
- Build trust within the organization and be the innovation partner of choice for business
- Contribute to PS&PV operational excellence by leveraging process improvements (new technologies, automation, streamlining) to increase quality, efficiency and productivity
- Collaborate with business and Development IT to bring projects to IPGB (Innovation and Project Governance Board)
- Manage internal and external stakeholder communication to ensure visibility of PS&PV innovation activities, promote asset reuse and sharing of expertise. Make Novartis expertise in Data & Digital visible.
- Provide project leadership and project management support to key projects.

Role Requirements:

- Degree in Life Sciences or Information Technology
- At least 10 years of relevant industry experience with significant experience in pharma drug development
- At least 5 years of leadership experience in an international, cross-functional environment – including

management of external providers

- Experience working within IT projects, with a thorough understanding of the issues revolving around aligning technology with business needs
- Broad industry knowledge of safety systems and regulations
- Training in strategy and operational research
- Passion to change the status quo, and track record of leading innovation projects
- Fluent English both spoken and written
- Project Management experience
- Strong interpersonal and unbossed leadership skills

Additional beneficial skills:

- Additional EU languages are desirable
- Demonstrated technology consulting experience and familiarity with modern system and data architecture principles
