Sommario

The BCN GBPA Software Developer drives the software development lifecycle — including working across functional teams to transform requirements into features, managing developments and processes, and conducting software testing and maintenance.

The hub offers a real opportunity to develop in a highly fast-paced, multicultural, technology-driven environment where collaboration and innovation are at the heart of who we are and what we do.

About the Role

Your responsibilities include, but not limited to:

- Work closely with senior developers to design, test, and deploy machine learning cloud-based Python applications.
- Write clean, efficient, and scalable code that meets project specifications.
- Help identify, debug, and resolve technical challenges.
- Contribute to team discussions by sharing ideas, providing feedback, and continuously learning from others.
- Collaborate with Business, Data Scientists, Data Engineers, Business Planning Analysts, and other stakeholders in regular meetings.
- Keep up-to-date with the latest Python developments and apply them to current projects.
- Assist in creating and maintaining technical documentation and project records.
- Demonstrate proficiency in spoken and written English.

What you'll bring to the role:

- Degree in Computer Science or other related Bachelor
- 0-3 years of experience in Python development (internships or projects welcome).
- Good understanding of Python fundamentals, including object-oriented programming.
- Basic knowledge of databases (e.g., MySQL, PostgreSQL) and how to interact with them using Python.
- Exposure to version control tools like Git.
- Enthusiasm for learning new tools, techniques, and technologies.
- Ability to work effectively within a team and take direction when needed.
- Solid grasp of algorithms and data structures.
- Experience with CI/CD pipelines and automation is an advantage.
- Knowledge of Git and Docker.
- Comfortable working with VSCode and devcontainers.

Preferred qualifications:

- Basic knowledge of machine learning is an asset.
- Familiarity with libraries like pandas, NumPy, and scikit-learn is advantageous.
- A strong sense of responsibility, urgency, and initiative.
- Self-driven with a strong work ethic, a passion for learning, and excellent problem-solving skills.

Why consider Novartis?

We believe the answers are found when curious, courageous and collaborative people like you are brought together in an inspiring environment. Where you're given opportunities to explore the power of digital and data. Where you're empowered to risk failure by taking smart risks, and where you're surrounded by people who share your determination to tackle the world's toughest medical challenges.

Imagine what you could do at Novartis!

Commitment to Diversity & Inclusion:
Novartis embraces diversity, equal opportunity and inclusion. We are committed to building diverse teams, representative of the patients and communities we serve, and we strive to create an inclusive workplace that cultivates bold innovation through collaboration, and empowers our people to unleash their full potential.
